

TuKoKe evaluation form, category Y: group projects where the participants belong to different age categories

1. What are the project's strengths?

2. How could the project be further improved?

3. Evaluate the participants' enthusiasm, the originality of the project, and/or the freshness of the idea.

4. Evaluate evidence of scientific thinking by the participants (for example, in outlining, defining, and addressing the problem).

5. Evaluate the quality of reporting, including the clarity and explanatory quality of the report.

6. What is the share contributed by the participant(s) compared to that of the supervisor, for example?

7. Other comments
